Imaging Disaster

Tokyo and the Visual Culture of
Japan's Great Earthquake of 1923

GENNIFER WEISENFELD

Focusing on one landmark catastrophic event in the history of an emerging modern nation—the Great Kantō Earthquake that devastated Tokyo and surrounding areas in 1923—this fascinating volume examines the history of the visual production of the disaster. The Kantō earthquake triggered cultural responses that ran the gamut from voyeuristic and macabre thrill to the romantic sublime, media spectacle to sacred space, mournful commemoration to emancipatory euphoria, and national solidarity to racist vigilantism and sociopolitical critique. Looking at photography, cinema, painting, postcards, sketching, urban planning, and even scientific visualizations, Weisenfeld argues that visual culture has powerfully mediated the evolving historical understanding of this major national disaster, ultimately enfolding mourning and memory into modernization.

Gennifer Weisenfeld is Associate Professor in the Department of Art, Art History & Visual Studies at Duke University and author of *MAVO: Japanese Artists and the Avant-Garde, 1905–1931* (UC Press).
